CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Project Number(s)/Environmental Log Number/Title:

TPM 20966; ER 05-03-004; LAGUS MINOR SUBDIVISION

- Lead agency name and address:
 County of San Diego, Department of Planning and Land Use
 5201 Ruffin Road, Suite B,
 San Diego, CA 92123-1666
- 3. a. Contact Emmet Aquino , Land Use/ Environmental Planner
 - b. Phone number: (858) 694-2604
 - c. E-mail: Emmet.Aquino@sdcounty.ca.gov.
- 4. Project location: The project is located northwest of the intersection of Villa Sierra Road and Villa Sierra Lane in the Valley Center Community Planning area in an incorporated area of San Diego County.

Thomas Brothers Coordinates: Page 1070, Grid 4/J

5. Project sponsor's name and address:

Jerilyn D. Lagus 13391 Anthony Ridge Road Valley Center, CA 92082

6. General Plan Designation

Community Plan: Valley Center Community Plan

Land Use Designation: 17 Estate Residential

Density: 1 du/2 or 4 acres (slope dependent)

7. Zoning

Use Regulation: A70 Limited Agriculure

Density: 1 du/ 2 acres

TPM 20966; ER 05-03-004 LAGUS MINOR SUBDIVISION

Special Area Regulation: none

8. Description of project:

The project is a minor residential subdivision of 10.1 acres (net) into three parcels measuring 2.9, 2.0 and 2.04 acres (net) within the Valley Center Community Planning Area. The project proposes 5,685 cubic yards of balanced grading to create house pads. The project is subject to the Regional Land Use Element 1.3 (EDA) Estate Development Area and General Plan Use Designation (17) Estate Residential, which permits 2 dwelling units per acre. The current zone for the property is A70, which requires that a minimum lot size of 2 acres be maintained.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

The project site and surroundings is a rural residential area with residences and agricultural uses. The project site contains avocado and orange groves and three associated agricultural buildings. To the west of the project site the lands are undeveloped and contain coastal sage scrub. To the east, south and north of the project site are residences on large parcels.

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	<u>Agency</u>
Minor Grading Permit	County of San Diego
Parcel Map Modification	County of San Diego
Tentative Parcel Map	County of San Diego
County Right-of-Way Permits	County of San Diego
Construction Permit	
Excavation Permit Encroachment	
Permit	
Grading Permit	County of San Diego
Grading Permit Plan Change	
Septic Tank Permit	County of San Diego
General Construction Storm water	RWQCB
Permit	
Water District Approval	Valley Center Municipal Water
	District
School District Approval	Unified Valley Center - Pauma
	School Districts

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED: The environmental factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Potentially Significant Impact Unless Mitigation Incorporated," as indicated by the checklist on the following pages.

Title

Printed Name

I. AFSTHETICS -- Would the project:

a) Have a substantial adverse effect on a scenic vista?				
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated		No Impact	
Discuss	sion/Explanation:			
No Impact: Scenic vistas are singular vantage points that offer unobstructed views of valued viewsheds, including areas designated as official scenic vistas along major highways or County designated visual resources. Based on a site visit completed by Jarrett Ramaiya on October 10, 2005, the proposed project is not located near or visible from a scenic vista and will not change the composition of an existing scenic vista. The project site is located at the intersection of Villa Sierra Road and Villa Sierra Lane. Therefore, the proposed project will not have any substantial adverse effect on a scenic vista.				
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	V	No Impact	

Discussion/Explanation:

No Impact: State scenic highways refer to those highways that are officially designated. A scenic highway is officially designated as a State scenic highway when the local jurisdiction adopts a scenic corridor protection program, applies to the California Department of Transportation for scenic highway approval, and receives notification from Caltrans that the highway has been designated as an official Scenic Highway. Based on a site visit completed by Jarrett Ramaiya on October 10, 2005 the proposed project is not located near or visible within the same composite viewshed as a State scenic highway and will not change the visual composition of an existing scenic resource within a State scenic highway. Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The project site is located at the intersection of Villa Sierra Road and Villa Sierra Lane in the Valley Center Community Planning Area. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

c) Substantially degrade the existing visual character or quality of the site and its surroundings?

TPM 20966; ER 05-03-004 LAGUS MINOR SUBDIVISION		- 5 -	March 5, 2009		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discuss	sion/Explanation:				
visible lather patt discuss viewer's and exp site and dominal ridgeling residen. The propert of the part develop the part area, the side of the part area.	Less Than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as rural residential with agricultural uses as a dominant feature. The visual exposure of this site is minimized as it is not located on a ridgeline. There is a diversity of land uses in the area ranging from single family residential, various agricultural uses, public infrastructure, and open lands. The proposed project is for a minor subdivision to create three residential parcels. The project is compatible with the existing visual environment's visual character and quality for the following reasons: the proposed parcel sizes are consistent with surrounding development to the west, grading is minimized to the extent required for building pads, the parcels will allow for continued rural pursuits consistent with the characteristic of the area, the land use changes are minimal in nature and do not propose a use that is not				
the enti- viewsher compre- located cumulat which w resident area. T effect of	The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: the project proposes three residential lots which would result in three single family dwellings. The surrounding area supports residential use and the proposed lots are consistent with the visual character or the area. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area. d) Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Less Than Significant Impact: The proposed project will use outdoor lighting and is located within Zone A as identified by the San Diego County Light Pollution Code, approximately 8 miles from the Palomar Mountain Observatory. However, it will not adversely affect nighttime views or astronomical observations, because the project will conform to the Light Pollution Code (Section 59.101-59.115), including the A lamp type and shielding requirements per fixture and hours of operation limitations for outdoor lighting and searchlights.

The project will not contribute to significant cumulative impacts on day or nighttime views because the project conforms to the Light Pollution Code. The Code was developed by the San Diego County Department of Planning and Land Use and Department of Public Works in cooperation with lighting engineers, astronomers, land use planners from San Diego Gas and Electric, Palomar and Mount Laguna observatories, and local community planning and sponsor groups to effectively address and minimize the impact of new sources light pollution on nighttime views. The standards in the Code are the result of this collaborative effort and establish an acceptable level for new lighting. Compliance with the Code is required prior to issuance of any building permit for any project. Mandatory compliance for all new building permits ensures that this project in combination with all past, present and future projects will not contribute to a cumulatively considerable impact. Therefore, compliance with the Code ensures that the project will not create a significant new source of substantial light or glare, which would adversely affect daytime or nighttime views in the area, on a project or cumulative level

<u>II. AGRICULTURE RESOURCES</u> -- In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:

,	Convert Prime Farmland, Unique Farmland, Unique Farmland, Importance Farmland), as shown on the Farmland Mapping and Monitoring Prog to non-agricultural use?	maps	s prepared pursuant to the
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project site has land designated as Farmland of Statewide Importance. As a result, the proposed project was reviewed by Jennifer Campos, Agricultural Specialist, and was determined not to have significant adverse project or cumulative level impacts related to the conversion of Farmland of Statewide Importance to a non-agricultural use for the following reasons: The project proposes parcels sizes which can accommodate continued and future agricultural uses, therefore

b)

the project will not result in an elimination of an agricultural resource. The Valley Center area has numerous residential parcels of similar size to the proposed parcel sizes that also contain active agriculture which contribute to the overall agricultural production in the County of San Diego. In addition, only a portion (approx. half) of the site actually qualifies for the Farmland of Statewide Importance designation based on the soils present and the USDA/NRCS's soil candidate listing for prime farmland and farmland of statewide importance. Therefore, because the site will allow future agricultural production, no potentially significant project or cumulative level conversion of Unique Farmland to a non-agricultural use will occur as a result of this project.

Conflict with existing zoning for agricultural use, or a Williamson Act contract?

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

,	nvolve other changes in the existing env nature, could result in conversion of Fari		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

Less Than Significant Impact: The project site and surrounding area within radius of three miles have land designated as Farmland of Statewide Importance, Unique Farmland and Farmland of Local Importance. As a result, the proposed project was reviewed by Jennifer Campos, Agricultural Specialist and was determined not to have significant adverse impacts related to the conversion of Unique Farmland, Farmland of Statewide Importance or Farmland of Local Importance to a non-agricultural use for the following reasons: the addition of three single family residences on the project site will introduce a land use (residential) that is commonly found throughout the area and is commonly found intermixed with agricultural uses. The presence of residences intermixed with agriculture in Valley Center provides evidence that a residential subdivision of this density will also not impede agricultural uses in the surrounding area

or onsite. There are active agricultural uses to the north of the project site, bordered only by the tip of the northern portion of the project's triangular shaped parcel. The lack of proposed residences in this northern portion of the parcel eliminates any potential for agricultural conversion on the parcel to the north. No other adjacent parcels have active agricultural uses which could be affected by the addition of three single family residences. Therefore, no potentially significant project or cumulative level conversion of Prime Farmland, Unique Farmland, Farmland of Statewide Importance, or Farmland of Local Importance to a non-agricultural use will occur as a result of this project.

III. AIR QUALITY -- Where available, the significance criteria established by the

make the following determinations. Would the project:					
a)	Conflict with or obstruct implementation of the San Diego Regional Air Quality Strategy (RAQS) or applicable portions of the State Implementation Plan (SIP)?				
	Potentially Significant Impact	\checkmark	Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated		No Impact		
Discus	ssion/Explanation:				
in SAN of the listed i identif expec consis	Less Than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will not result in emissions of significant quantities of criteria pollutants listed in the California Ambient Air Quality Standards or toxic air contaminants as identified by the California Air Resources Board. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the project is consistent the SANDAG growth projections used in the RAQS and SIP, therefore, the project will not contribute to a cumulatively considerable impact.				
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?					
	Potentially Significant Impact	\checkmark	Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated		No Impact		

Discussion/Explanation:

Less Than Significant Impact: In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Air Pollution Control District (SDAPCD) has established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. For CEQA purposes, these screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the CEQA Air Quality Handbook for the South Coast Air Basin (SCAB), which has stricter standards for emissions of ROCs/VOCs than San Diego's, is appropriate. However, the eastern portions of the county have atmospheric conditions that are characteristic of the Southeast Desert Air Basin (SEDAB). SEDAB is not classified as an extreme non-attainment area for ozone and therefore has a less restrictive screening-level. Projects located in the eastern portions of the County can use the SEDAB screening-level threshold for VOCs.

The project proposes a residential subdivision and associated grading to create three residential parcels. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in pollutant emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA Air Quality Handbook section 6.2 and 6.3. In addition, the vehicle trips generated from the project will result in 36 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA Air Quality Handbook section 6.2 and 6.3 for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

,	Result in a cumulatively considerable new which the project region is non-attainme ambient air quality standard (including requantitative thresholds for ozone precure	nt und	der an applicable federal or state
;		eleasi	ng emissions which exceed
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O_3). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM_{10}) under the CAAQS. O_3 is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO_x) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM_{10} in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust

from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Air quality emissions associated with the project include emissions of PM_{10} , NO_x and VOCs from construction/grading activities, and VOCs as the result of increase of traffic from operations at the facility. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal and localized, resulting in PM_{10} and VOC emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the South Coast Air Quality Management District (SCAQMD) CEQA air quality handbook section 6.2 and 6.3. The vehicle trips generated from the project will result in 36 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the Screening-Level Criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3 for VOCs and PM_{10} .

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by SDAPCD Rule 20.2 and by the SCAQMD CEQA air quality handbook section 6.2 and 6.3, therefore, the construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any O_3 precursors.

d)	Expose sensitive receptors to substantial pollutant concentrations?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact			

Discussion/Explanation:

No Impact: Air quality regulators typically define sensitive receptors as schools (Preschool-12th Grade), hospitals, resident care facilities, or day-care centers, or other facilities that may house individuals with health conditions that would be adversely impacted by changes in air quality. Based a site visit conducted by Jarrett Ramaiya on October 10, 2005, sensitive receptors have not been identified within a quarter-mile (the radius determined by the SCAQMD in which the dilution of pollutants is typically significant) of the proposed project. Furthermore, no point-source emissions of air pollutants (other than vehicle emissions) are associated with the project. As such, the project will not expose sensitive populations to excessive levels of air pollutants.

e) Create objectionable odors affecting a substantial number of people?

No Impact: County staff, Jarrett Ramaiya has conducted a site visit on October 10, 2005 and determined that the proposed project site does not contain any riparian habitats or other sensitive natural communities as defined by the County of San Diego Multiple Species Conservation Program, County of San Diego Resource Protection Ordinance, Natural Community Conservation Plan, Fish and Game Code, Endangered Species Act, Clean Water Act, or any other local or regional plans, policies or

regulations. In addition, no riparian or otherwise sensitive habitat has been identified within or adjacent to the area proposed for off-site impacts resulting from road improvements, utility extensions and the dedication of a 100 foot Limited Building Zone along the project boundaries. Therefore, the project is not expected to have direct or indirect impacts from development on any riparian habitat or other sensitive natural community.

c)	Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				
	Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact		
<u>L</u>	Mitigation Incorporated	\checkmark	No Impact		
Discu	ssion/Explanation:				
2005 define verna through	and determined that the proposed projected by Section 404 of the Clean Water Actal pool, stream, lake, river or water of the light direct removal, filling, hydrological intepsed development. Therefore, no impacts of the Clean Water Act in which the Army	t site of the site	does not contain any wetlands as ding, but not limited to, marsh, hat could potentially be impacted on, diversion or obstruction by the occur to wetlands defined by Section		
d)	Interfere substantially with the movement or wildlife species or with established native worldors, or impede the use of native w	ative re	esident or migratory wildlife		
	Potentially Significant Impact		Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact		

Discussion/Explanation:

No Impact: Based on an analysis of the County's Geographic Information System (GIS) records, the County's Comprehensive Matrix of Sensitive Species, site photos, and, a site visit by Jarrett Ramaiya on October 10, 2005 it has been determined that the site has been completely disturbed through active agricultural uses and that the site contains no native vegetation or habitats. Therefore, impedance of the movement of any native resident or migratory fish or wildlife species, or established native resident or migratory wildlife corridors, or impedance of the use of native wildlife nursery sites would not be expected as a result of the proposed project.

e)	Conflict with the provisions of any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan or any other local policies or ordinances that protect biological resources?

Disc	cuss	sion/l	Explanation:		
	•		The project is not located in a faul	•	

Alguist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California. Also, staff has reviewed the project and has concluded that no other substantial evidence of recent (Holocene) fault activity is present within the project site. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known hazard zone as a result of this project.

Strong seismic ground shaking? ☐ Potentially Significant Impact ✓ Less than Significant Impact Potentially Significant Unless No Impact

Discussion/Explanation:

Mitigation Incorporated

ii.

Less Than Significant Impact: The project is located within 5 kilometers of the centerline of a known active-fault zone as defined within the Uniform Building Code's Maps of Known Active Fault Near-Source Zones in California. To ensure the structural integrity of all buildings and structures, the project must conform to the Seismic Requirements -- Chapter 16 Section 162- Earthquake Design as outlined within the California Building Code. Section 162 requires a soils compaction report with proposed foundation recommendations to be approved by a County Structural Engineer before the issuance of a building or grading permit. Therefore, there will be no potentially significant impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking as a result of this project.

Seismic-related ground failure, including liquefaction? iii.

Less Than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as Fallbrook sandy loam, 9 to 15% slopes, eroded (FaD2); Fallbrook sandy loam, 5 to 9% slopes, eroded (FaC2); Fallbrook rocky sandy loam, 5 to 9% slopes; and Bonsall sandy loam, 9 to 15% slopes, eroded (BID2) that have a soil erodibility rating of "severe" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

• The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.

- The project has prepared a Stormwater Management Plan dated November 13, 2008, prepared by Wynn Engineering. The plan includes the following Best Management Practices to ensure sediment does not erode from the project site: silt fencing, fiber rolls, storm drain inlet protection, stockpile management, stabilized construction entrance/exit, gravel bag berm, concrete waste management, water conservation practices, grass swale, and porous concrete.
- The project involves grading. However, the project is required to comply with the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING). Compliance with these regulations minimizes the potential for water and wind erosion.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

c)	Will the project produce unstable geological conditions that will result in ad impacts resulting from landslides, lateral spreading, subsidence, liquefaction collapse?						
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact				

Discussion/Explanation:

No Impact: The project is not located on or near geological formations that are unstable or would potentially become unstable as a result of the project. On a site visit conducted by Jarrett Ramaiya on October 10, 2005 no geological formations or features were noted that would produce unstable geological conditions as a result of the project. For further information refer to VI Geology and Soils, Question a., i-iv listed above.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

	0966; ER 05-03-004 S MINOR SUBDIVISION	- 18 -	March 5, 2009

, a	Have soils incapable of adequately alternative wastewater disposal sydisposal of wastewater?		•
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		

Less Than Significant Impact: The project proposes to discharge domestic waste to on-site wastewater systems (OSWS), also known as septic systems. The project involves three standard subsurface septic systems located on each proposed parcel. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS lay-out for the project pursuant to DEH, Land and Water Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." DEH approved the project's OSWS on July 16, 2007. Therefore, the project has soils capable of adequately supporting the use of septic tanks or alternative wastewater disposal systems as determined by the authorized, local public agency. In addition, the project will comply with the San Diego

County Code of Regulatory Ordinances, Title 6, Div. 8, Chap. 3, Septic Tanks and Seepage Pits. VII. HAZARDS AND HAZARDOUS MATERIALS -- Would the project: Create a significant hazard to the public or the environment through the routine transport, storage, use, or disposal of hazardous materials or wastes? Potentially Significant Impact Less than Significant Impact Potentially Significant Unless No Impact Mitigation Incorporation Discussion/Explanation: **No Impact**: The project will not create a significant hazard to the public or the environment because it does not propose the storage, use, transport, emission, or disposal of Hazardous Substances, nor are Hazardous Substances proposed or currently in use in the immediate vicinity. Create a significant hazard to the public or the environment through reasonably b) foreseeable upset and accident conditions involving the release of hazardous materials into the environment? ☐ Potentially Significant Impact Less than Significant Impact Potentially Significant Unless No Impact Mitigation Incorporated Discussion/Explanation: **No Impact:** The project will not contain, handle, or store any potential sources of chemicals or compounds that would present a significant risk of accidental explosion or release of hazardous substances.

g)	Impair implementation of or physically response plan or emergency evacuation	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.

OPERATIONAL AREA EMERGENCY PLAN:

Less Than Significant Impact: The Operational Area Emergency Plan is a framework document that provides direction to local jurisdictions to develop specific operational area of San Diego County. It provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The project will not interfere with this plan because it will not prohibit subsequent plans from being established.

ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

No Impact: The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

iii. OIL SPILL CONTINGENCY ELEMENT

No Impact: The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

No Impact: The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

v. DAM EVACUATION PLAN

No Impact:	The Dam	Evacuation	Plan will	not be	interfered	with I	oecause	the p	roject is
located outsi	ide a dam	inundation 2	zone.

	Potentially Significant Impact		Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact

No Impact: The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. artificial lakes, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Moreover, based on a site visit conducted by Jarrett Ramaiya on October 10, 2005 there are none of these uses on adjacent properties. Therefore, the project will not substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

	YDROLOGY AND WATER QUALITY -		ld the project:
a) '	Violate any waste discharge requireme	nts?	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: The project proposes a minor subdivision which requires NPDES General Permit for Discharges of Storm Water Associated with Construction Activities. The project applicant has provided a copy of a Stormwater Management Plan which demonstrates that the project will comply with all requirements of of the NPDES permit. The project site proposes and will be required to implement the following site design measures and/or source control BMP's and/or treatment control BMP's to reduce potential pollutants to the maximum extent practicable from entering storm water runoff: use efficient irrigation systems and landscape design, private roadway systems shall include a rural swale system, biofilters, and porous concrete. These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

Finally, the project's conformance to the waste discharge requirements listed above ensures the project will not create cumulatively considerable water quality impacts related to waste discharge because, through the permit, the project will conform to Countywide watershed standards in the JURMP and SUSMP, derived from State regulation to address human health and water quality concerns. Therefore, the project will not contribute to a cumulatively considerable impact to water quality from waste discharges.

b) Is the project tributary to an already impaired water body, as listed on the Clean Water Act Section 303(d) list? If so, could the project result in an increase in any pollutant for which the water body is already impaired?

TPM 20966; ER 05-03-004 LAGUS MINOR SUBDIVISION	- 24 -	March 5, 2009
☐ Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
Potentially Significant Unless Mitigation Incorporated		No Impact

Less Than Significant Impact: The project lies in the Bonsall hydrologic subarea, within the San Luis Rey hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2007, although the mouth of the San Luis Rey impaired for coliform bacteria, no portion of the San Luis Rey River, which is tributary to the Pacific Ocean, is impaired. Constituents of concern in the San Luis Rey River watershed include coliform bacteria, nitrate, sediment, and pesticides.

The project proposes the following activities that are associated with these pollutants: construction activities associated with three new single family dwellings. However, the following site design measures and/or source control BMP's and/or treatment control BMP's will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: use efficient irrigation systems and landscape design, private roadway systems shall include a rural swale system, biofilters, and porous concrete.

The proposed BMP's are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm Water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

,	Could the proposed project cause or contribute to an exceedance of appl surface or groundwater receiving water quality objectives or degradation beneficial uses?						
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact				

Less Than Significant Impact: The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the Bonsall hydrologic subarea, within the San Luis Rey hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply; industrial service supply; freshwater replenishment; hydropower generation; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; marine habitat; migration of aquatic organisms; and, rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: sediment discharge due to construction activities and post-construction areas left bare, nutrients from fertilizers, trash and debris deposited in drain inlets, hydrocarbons from paved areas, pesticides from landscaping and home use, oxygen demanding substances, oil and grease, and bacteria and viruses. However, the following site design measures and/or source control BMP's and/or treatment control BMP's will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: use efficient irrigation systems and landscape design, private roadway systems shall include a rural swale system, biofilters, and porous concrete.

In addition, the proposed BMP's are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

	Substantially deplete groundwater suppl groundwater recharge such that there we a lowering of the local groundwater table existing nearby wells would drop to a lev uses or planned uses for which permits l	ould be level level wh	e a net deficit in aquifer volume or (e.g., the production rate of pre- ich would not support existing land

		Potentially Significant Impact Potentially Significant Unless		Less than Significant Impact No Impact	

Mitigation Incorporated

Discussion/Explanation:

Less Than Significant Impact: The Department of Public Works staff has reviewed the Stormwater Management Plan (SWMP) dated November 13, 2008, Preliminary Drainage Study dated May 23, 2007, and Preliminary Grading Plan prepared by Wynn Engineering. Upon review of these documents, plans and information in file, it has been determined that no structures are proposed to be placed in any 100-year flood hazard areas; therefore, no impact will occur.

k) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Dis	cuss	sion/Explanation:		
Mo Impact: The Department of Public Works staff has reviewed the Stormwater Management Plan (SWMP) dated November 13, 2008, Preliminary Drainage Study dated May 23, 2007, and Preliminary Grading Plan prepared by Wynn Engineering. Upon review of these documents, plans and information in file, it has been determined that the project site lies outside any identified special flood hazard area that includes a mapped dam inundation area for a major dam/reservoir within San Diego County. In addition, the project is not located immediately downstream of a minor dam that could potentially flood the property. Therefore, the project will not expose people to a significant risk of loss, injury or death involving flooding as a result of the failure of a levee or dam.				
l)	I	nundation by seiche, tsunami, or mudflo	ow?	
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discussion/Explanation:				
i.	5	SEICHE		

No Impact: The project site is not located along the shoreline of a lake or reservoir; therefore, could not be inundated by a seiche.

ii. TSUNAMI

No Impact: The project site is located more than a mile from the coast; therefore, in the event of a tsunami, would not be inundated.

iii. MUDFLOW

No Impact: Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. Also, it has been determined that the geologic environment of the project area is not located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity. In addition, though the project does propose land disturbance that will expose unprotected soils, the project is not located downstream from unprotected, exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.

IX. LAND USE AND PLANNING Would the project:			
a) Physically divide an established community?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
No Impact: The project does not propose the introduction of new infrastructure such major roadways or water supply systems, or utilities to the area. Therefore, the proposed project will not significantly disrupt or divide the established community.			
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?			
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project is subject to the Regional Land Use Element Policy 1.3 Estate Development Area and General Plan Land Use Designation 17 Estate Residential. The General Plan requires minimum gross parcel sizes of 2 or 4 acres depending on slope acres and not more than .5 dwelling units per acre. The proposed project has gross parcel sizes and density that are consistent with the General Plan. The project is subject to the policies of the Valley Center Community Plan. Specifically, there are several residential goals and policies that are applicable to

this project such as the requirement that the rural atmosphere of the Valley Center Planning area be preserved and enhanced, ridgeline development to be discouraged, preservation of natural features to be encouraged, and extensive or severe grading to be discouraged. The project is consistent with these policies because ridgeline development is not proposed, the grading is not severe or extensive and it follows the natural terrain of the area, and parcel sizes are consistent with other residential developments in the area. Therefore, the proposed project is consistent with the policies of the Valley Center Community Plan. The current zone is A70, which requires a net minimum lot size of 2 acres. The proposed project is consistent with the Zoning Ordinance requirements for minimum lot size.

 X. MINERAL RESOURCES Would the project: a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? 				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
Less Than Significant Impact: Although the project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate Materials in the Western San Diego Production-Consumption Region, 1997) as an area of undetermined mineral resources MRZ-3, staff has reviewed the site's geologic environment and has determined that the site is not located within an alluvial river valley or underlain by coastal marine/non-marine granular deposits. Therefore, no potentially significant loss of availability of a known mineral resource of value to the region and the residents of the state will occur as a result of this project. Moreover, if the resources are not considered significant mineral deposits, loss of these resources cannot contribute to a potentially significant cumulative impact.				
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The project site is zoned A70, which is not considered to be an Extractive Use Zone (S-82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).

March 5, 2009

XI. **NOISE** -- Would the project result in:

a)	Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact		
	Potentially Significant Unless Mitigation Incorporated		No Impact		

Discussion/Explanation:

Less Than Significant Impact:

The project is 3-lot residential subdivision and will be occupied by residents. Based on a site visit completed by Jarrett Ramaiya on October 10, 2005 the surrounding area supports single family residences and is occupied by residents. The project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

General Plan – Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive areas to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to the project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute. Project implementation is not expected to expose existing or planned noise sensitive areas to road, airport, heliport, railroad, industrial or other noise in excess of the CNEL 60 dB(A). This is based on staff's review of projected County noise contour maps (CNEL 60 dB(A) contours) and review by County Noise Specialist John Bennett on February 16, 2006. Therefore, the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, Noise Element.

Noise Ordinance - Section 36-404

Non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned A70 that has a one-hour average sound limit of 50 decibels. The adjacent properties are zoned A70 and have one-hour average sound limit of 50 decibels from 7 a.m. to 10 p.m and 45 decibels from 10 p.m. to 7 a.m. Based on review by staff on November 17, 2005, the project's noise levels are not anticipated to impact adjoining properties or exceed County Noise Standards, which is 50 decibels from 7 a.m. to 10 p.m and 45 decibels from 10 p.m. to 7 a.m, because the project does not involve any noise producing equipment that would exceed applicable noise levels at the adjoining property line.

The project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-309). Construction operations will occur only during permitted hours of operation pursuant to Section 36-309. Also, It is not anticipated that the project will operate construction equipment in excess of an average sound level of 75dB between the hours of 7 AM and 7 PM.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b and County of San Diego Noise Ordinance (Section 36-404 and 36.309) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b) and County of San Diego Noise Ordinance (Section 36-404 and 36.309) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

,	Exposure of persons to or genera groundborne noise levels?	ation of exce	ssive groundborne vibration or
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		

No Impact:

The project does not propose any of the following land uses that can be impacted by groundborne vibration or groundborne noise levels.

- 1. Buildings where low ambient vibration is essential for interior operation, including research and manufacturing facilities with special vibration constraints.
- 2. Residences and buildings where people normally sleep including hotels, hospitals, residences and where low ambient vibration is preferred.

- 3. Civic and institutional land uses including schools, churches, libraries, other institutions, and quiet office where low ambient vibration is preferred.
- 4. Concert halls for symphonies or other special use facilities where low ambient vibration is preferred.

Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels on-site or in the surrounding area.

c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
Less Than Significant Impact: The project involves the following permanent noise sources that may increase the ambient noise level: vehicle traffic on nearby roadway and noise associated with the addition of three residences. As indicated in the response listed under Section XI Noise, Question a., the project would not expose existing or planned noise sensitive areas in the vicinity to a substantial permanent increase in noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable local, State, and Federal noise control. Also, the project is not expected to expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels based on review of the project by County staff. Studies completed by the Organization of Industry Standards (ISO 362; ISO 1996 1-3; ISO 3095; and ISO 3740-3747) state an increase of 10 dB is perceived as twice as loud and is perceived as a significant increase in the ambient noise level.				
The project will not result in cumulatively noise impacts because a list of past, present and future projects within in the vicinity were evaluated. It was determined that the project in combination with a list of past, present and future project would not expose existing or planned noise sensitive areas to noise 10 dB CNEL over existing ambient noise levels. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.				
	d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Less Than Significant Impact: The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting, drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.

Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-309), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-309. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.

e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?		
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact
Discus	ssion/Explanation:		
No Impact: The proposed project is not located within a Comprehensive Land Use Plan (CLUP) for airports or within 2 miles of a public airport or public use airport. Therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.			
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The proposed project is not located within a one-mile vicinity of a private airstrip; therefore, the project will not expose people residing or working in the project area to excessive airport-related noise levels.

 XII. POPULATION AND HOUSING Would the project: a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? 				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discuss	sion/Explanation:			
No Impact: The proposed project will not induce substantial population growth in an area because the project does not propose any physical or regulatory change that would remove a restriction to or encourage population growth in an area including, but limited to the following: new or extended infrastructure or public facilities; new commercial or industrial facilities; large-scale residential development; accelerated conversion of homes to commercial or multi-family use; or regulatory changes including General Plan amendments, specific plan amendments, zone reclassifications, sewer or water annexations; or LAFCO annexation actions.				
,	Displace substantial numbers of existing of replacement housing elsewhere?	hous	ing, necessitating the construction	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				
No Impact: The proposed project will not displace existing housing since the site is currently vacant. The addition of three dwelling units will yield a net gain of available housing.				
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				
	Potentially Significant Impact		Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated	$\overline{\checkmark}$	No Impact	
Discussion/Explanation:				
No Impact:				

The proposed project will not displace a substantial number of people since the site is currently vacant of any habitable structures.

XIII. a)	PUBLIC SERVICES Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance service ratios, response times or other performance objectives for any of the public services:				
	i. ii. iii. iv. v.	Fire protection? Police protection? Schools? Parks? Other public facilities?			
	_ ¬ Pot	entially Significant Impact entially Significant Unless igation Incorporated		Less than Significant Impact No Impact	
Disc	ussion/	Explanation:			

No Impact: Based on the service availability forms received for the project, the proposed project will not result in the need for significantly altered services or facilities. Service availability forms have been provided which indicate existing services are available to the project from the following agencies/districts: Valley Center Fire Protection District, Valley Center-Pauma Unified School District, and Valley Center Municipal Water District. The project does not involve the construction of new or physically altered governmental facilities including but not limited to fire protection facilities, sheriff facilities, schools, or parks in order to maintain acceptable service ratios, response times or other performance service ratios or objectives for any public services. Therefore, the project will not have an adverse physical effect on the environment because the project does not require new or significantly altered services or facilities to be constructed.

XIV. RECREATION

,	Would the project increase the use of or other recreational facilities such tha facility would occur or be accelerated?	t substa	· • • • • • • • • • • • • • • • • • • •
	Potentially Significant Impact	\checkmark	Less than Significant Impact
	Potentially Significant Unless Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The project involves a residential subdivision that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay park fees. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

There is an existing surplus of County Regional Parks. Currently, there is over 21,765 acres of regional parkland owned by the County, which far exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive surplus of existing publicly owned lands that can be used for recreation the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result any cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant surplus of regional recreational facilities will remain.

,	Does the project include recreational face expansion of recreational facilities, whice on the environment?	•
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

No Impact: The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, the construction or expansion of recreational facilities cannot have an adverse physical effect on the environment.

XV. TRANSPORTATION/TRAFFIC -- Would the project:

a)	Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio on roads, or congestion at intersections)?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	ssion/Explanation:

b) Exceed, either individually or cumulatively, a level of service standard established by the County congestion management agency and/or as identified by the County of San Diego Transportation Impact Fee Program for designated roads or highways?					
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact		

Discussion/Explanation:

Potentially Significant Impact Unless Mitigation Incorporated:

The proposed project will result in an additional 24 ADT. The project was reviewed by the Department of Public Works and was determined not to exceed a level of service (LOS) standard at the direct project level. Therefore, the project will not have a significant direct project-level impact on the LOS standards established by the County congestion management agency for designated roads or highways. Cumulative impacts may not be less than significant.

However, the County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential

cumulative impacts caused by traffic from future development. This program is based on a summary of projections method contained in an adopted planning document, as referenced in the State CEQA Guidelines Section 15130 (b)(1)(B), which evaluates regional or area wide conditions contributing to cumulative transportation impacts. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by other public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

The proposed project generates an additional 24 ADT. These trips will be distributed on circulation element roadways in the unincorporated county that were analyzed by the TIF program, some of which currently or are projected to operate at inadequate levels of service. These project trips therefore contribute to a potential significant cumulative impact and mitigation is required. The potential growth represented by this project was included in the growth projections upon which the TIF program is based. Therefore, payment of the TIF, which will be required at issuance of building permits, in combination with other components of the program described above, will mitigate potential cumulative traffic impacts to less than significant.

In order to mitigate its incremental contribution to significant cumulative traffic impacts, the proposed project will pay the TIF prior to obtaining building permits.

c)	Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				
		Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Dis	cus	sion/Explanation:			
No Impact: The proposed project is located outside of an Airport Master Plan Zone and is not adjacent to any public or private airports; therefore, the project will not result in a change in air traffic patterns.					
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

a)	Exceed wastewater treatment requipment Quality Control Board?			
	Potentially Significant Impact	\checkmark	Less than Significant Impact	
	Potentially Significant Unless Mitigation Incorporated		No Impact	
Discus	sion/Explanation:			
Less Than Significant Impact: The project proposes to discharge domestic waste to on-site wastewater systems (OSWS), also known as septic systems. The project involves three standard subsurface septic systems located on each proposed parcel. Discharged wastewater must conform to the Regional Water Quality Control Board's (RWQCB) applicable standards, including the Regional Basin Plan and the California Water Code. California Water Code Section 13282 allows RWQCBs to authorize a local public agency to issue permits for OSWS "to ensure that systems are adequately designed, located, sized, spaced, constructed and maintained." The RWQCBs with jurisdiction over San Diego County have authorized the County of San Diego, Department of Environmental Health (DEH) to issue certain OSWS permits throughout the County and within the incorporated cities. DEH has reviewed the OSWS lay-out for the project pursuant to DEH, Land and Water Quality Division's, "On-site Wastewater Systems: Permitting Process and Design Criteria." DEH approved the project's OSWS on July 16, 2007. Therefore, the project is consistent with the wastewater treatment requirements of the RWQCB as determined by the authorized, local public agency.				
,	Require or result in the construction facilities or expansion of existing fa significant environmental effects?			
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			

No Impact: The project does not include new or expanded water or wastewater treatment facilities. In addition, the project does not require the construction or expansion of water or wastewater treatment facilities. Service availability forms have been provided which indicate adequate water facilities are available to the project from the following agencies/districts: Valley Center Municipal Water District. Wastewater treatment is provided by onsite standard subsurface septic systems which were approved by the Department of Environmental Health on July 16, 2007. Therefore, the project will not require any construction of new or expanded facilities, which could cause significant environmental effects.

c)	Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact

	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				

Less than Significant Impact: Implementation of the project will generate solid waste. All solid waste facilities, including landfills require solid waste facility permits to operate. In San Diego County, the County Department of Environmental Health, Local Enforcement Agency issues solid waste facility permits with concurrence from the California Integrated Waste Management Board (CIWMB) under the authority of the Public Resources Code (Sections 44001-44018) and California Code of Regulations Title 27, Division 2, Subdivision 1, Chapter 4 (Section 21440et seq.). The project will deposit all solid waste at a permitted solid waste facility and therefore, will comply with Federal State and local statutes and regulations related to solid waste

r odoral, otato, and local statatos and regulations related to solid waste.				
XVII. MANDATORY FINDINGS OF SIGNIFICANCE: Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	sion/Explanation:			
Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. There is no substantial evidence that there are biological or cultural resources that are affected or associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.				
, (Does the project have impacts that are in considerable? ("Cumulatively considerable project are considerable when viewed projects, the effects of other current projects)?	ole" m in cor	eans that the incremental effects of inection with the effects of past	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated		Less than Significant Impact No Impact	

Discussion/Explanation:

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER
Stehly TPM	TPM 20689
Sundance Ranch (formerly Winchester Ranch)	TM 5403 (adjacent to west)
Osterkamp TM	TM 5222

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there is no substantial evidence that there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

,	Does the project have environmental eff adverse effects on human beings, either	
	Potentially Significant Impact Potentially Significant Unless Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there is no substantial evidence that there are adverse effects on human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
